

The XM Textiles Eco collection is a range of fabrics for basic workwear.

ECO-190 LIGHT POLY/COTTON BLEND 190GSM TWILL 2/1

ECO-210 POLY/COTTON BLEND 210GSM TWILL 2/1

It is designed for the best basic workwear, which makes it a reasonable choice for any garment.

Our company's aim is to provide our customers with the best choice of fabrics for workwear, uniforms and protective clothing.

We believe that social responsibility is a key factor of the successful development of any business. That's why we pay attention to the questions of care and protection of the environment. XM Textiles is determined to do everything we can to make these plans a reality.

As for this, we offer a new line of workwear fabrics made of special raw materials called ECO with the following benefits:

Attractive price – That helps you being ahead of your competitors.

Long life cycle - Thanks to polyester on the face side the fabrics offer significantly better peelling & abrasion resistance.

Comfortable – Cotton is on the inner side and it provides excellent hygienic properties.

Visibility – Due to the reflective surface the visibility of the garment is increased.

Environmentally friendly – XM Textiles Eco fabrics use special fibers, resulting in less waste in production process.
